Mellieha, Malta

Portfolio

Product Manager specialising in monetization, conversion optimisation, and lifecycle strategy for subscription-based digital products. Owns free-to-paid journeys across onboarding, trials, and long-term retention, with responsibility for pricing, feature gating, and upgrade flows. Experienced in experimentation-driven product development, cohort analysis, and LTV modelling—balancing revenue growth with user trust and long-term value. Leads cross-functional delivery with design, engineering, and data teams to ship and iterate fast.

KEY ACHIEVEMENTS

- Owned and scaled monetization strategy across multiple subscription-driven products, delivering +15% uplift in 12-week LTV through improved value revelation and conversion design.
- Designed and shipped a behavioural segmentation framework (account-age × value), enabling personalised upgrade paths and feature packaging; contributed to +10% gross revenue and +20% profit YoY.
- Led pricing, trial, and lifecycle experiments across onboarding and recurring usage, improving payer conversion by +5% while maintaining retention and engagement quality.
- Planned and executed experimentation roadmaps (A/B tests on pricing, packaging, and upgrade flows) driving sustained ARPPU and retention improvements.

SKILLS

Monetization Product Strategy

- Free-to-paid journey design
- Subscription tiers & trials
- Feature gating & upgrade flows
- Pricing strategy & value framing
- Ethical monetization & trust

Experimentation & Analytics

- A/B testing & hypothesis design
- Cohort analysis & retention curves
- LTV modelling & price sensitivity
- Funnel optimisation (activation→conversion)

Live Service & Game Monetization

- Revamped Season System
- Meta-Missions Feature
- Battle Pass
- Live-Ops Annual Calendar

Product Leadership

- Outcome-based roadmapping
- Backlog prioritisation & trade-offs
- Stakeholder communication
- Cross-functional leadership (Design/Eng/Data)

Tooling & Data

- Advanced Excel/Sheets (modelling)
- SQL (analysis & validation)
- Tableau (KPI monitoring and data-centric decision-making)

EXPERIENCE

Twin Harbour Interactive

Principal Monetization Manager — Jun 2025 – Present

- Own monetization product strategy across a subscription-driven portfolio generating ~€80M annually, with accountability for conversion, retention, and long-term value.
- Define and prioritise a monetization roadmap focused on outcomes; balance revenue goals with user trust and experience quality through clear trade-offs.

- Design free-to-paid journeys including onboarding flows, upgrade prompts, pricing structures, and lifecycle incentives informed by behavioural data.
- Lead experimentation strategy (pricing, packaging, upgrade flows); partner with design, engineering, and data teams to ship, measure, and iterate rapidly.
- Establish monetization standards and decision frameworks used across multiple product teams.

Twin Harbour Interactive (formerly Dorado Games)

Monetization Manager — Jun 2023 – Jun 2025

- Owned conversion optimisation and monetization initiatives across live subscription products, from early lifecycle to long-term retention.
- Designed behavioural segmentation models to personalise feature access and pricing, improving conversion and LTV at scale.
- Ran structured experimentation programmes (pricing, trials, packaging); analysed cohort behaviour to guide product decisions and rollouts.
- Partnered with engineering and BI to improve data visibility, experimentation reliability, and decision quality through repeatable reporting and validation.

Dorado Games

Community Manager — Jan 2021 – Jun 2023

- Acted as voice of the user; translated qualitative feedback and behavioural signals into actionable product improvements.
- Contributed to feature prioritisation and UX improvements that increased engagement and satisfaction in competitive user segments.

Government of Malta

Executive — EU Policy and Legislation — Jan 2015 – Dec 2020

- Led complex stakeholder negotiations and policy trade-offs; built decision-making and communication skills transferable to outcome-driven product leadership.

EDUCATION

Bachelor of Science in Computing (Games Design & Development) — St Martins Institute of Higher Education, In Progress (2022 – Present)

Master of Arts in Diplomatic Studies — University of Malta, 2014

Bachelor of Arts (Hons) in International Relations — University of Malta, 2010 – 2013
